QUALITY OF STOCK

We sincerely believe that our prices are the lowest that can be charged and still give you good quality and service. This is partly made possible by the reduced cost of our price list and we are passing this saving on to our buyers. We feel sure that the quality of our stock is the best that can be grown at any cost. This has been verified by the many repeat orders we receive each year from satisfied customers. Our soil is well adapted to the growing of vigorous clean bulbs and irrigation is resorted to when necessary so that the bulbs will not lose their vigor struggling to exist during dry weather. We guarantee all bulbs to be free of disease and insect pests, true to name and full sized. A trial order will convince you of the superior quality of our stock.
